Prime Technical Construction Co.

Pre Qualification

A word from our Chairman...

Dear Client,

On behalf of the firm and my colleagues, I would like to express my gratitude for being granted this opportunity to introduce our firm as a specialized contractor for industrial, commercial and residential development.

We have been operating as a certified builder for Zamil Steel Co. since 1979. We have executed hundreds of projects in the western province and other parts of the Kingdom of Saudi Arabia.

Such projects are warehouses, factories, office buildings, wedding halls, and showrooms in which most were executed on a turnkey basis. Moreover, we have executed projects such as private villas and compounds where fine quality and experience play a vital role in exceeding our clients' expectations.

We work alongside a highly qualified consulting department for designing, planning and development that helps in the assessment and evaluation of projects. This department is supported by a highly qualified technical team that has developed a soaring level of expertise over the years. This long-term experience has been utilized today and is available to all our valued clients. Our firm is at all times ready to place its services under your management.

You will find attached a list of the chosen projects that our firm has executed and believes may interest your consideration.

We appreciate your concern in our services and will always look forward to hearing from you.

Best regards,

Eng. Abdelnasser Fouad Ghazi
Chairman
